Up a river on a Kayak is an experience that can only be done in Sardinia from Bosa. The river Temo offers the possibility to admire the city from an unusual perspective.

Along the way are the 18th century tanneries, the real wealth of industrial archeology, which strongly characterize the appearance of the left bank of the river. On the other side overlooking the river are the nineteenth-century buildings, near the medieval district of Sa Costa dominated by the Malaspina castle.

After passing the old bridge, built in trachyte locally, and the Cathedral of the Immaculate, we arrive at the old church of S. Peter extramuros, where you can moor and visit the most important religious building in Bosa, one of the oldest of the Romanesque period churches in Sardinia.
